Campus printing has a queue problem.

Students scan, pay and walk away for food and for transit. On campus, printing still means a crowded stationery counter between lectures. A kiosk inside the college turns that demand into your business.

01

A ten-minute break lost in the queue

Students have minutes between lectures. A counter queue uses most of them.

02

Campus shops close early

Late-night assignments and early-morning submissions have nowhere to print.

03

Exam week outruns one counter

Assignment deadlines and exams send in more jobs than one person can handle at a time.

Snaprint answers all three.

A kiosk placed where students already are: a library, a hostel block, a department corridor. Scan, upload, pay, collect. It runs unattended, all day.

Phone to paper in 60 seconds.

The kiosk opens the print flow in the phone browser. There is no app to install, no USB drive and no one to wait for.

01

Scan the QR

Any phone camera, Android or iOS.

02

Add files

PDF, DOCX or JPG from phone or drive.

03

Set it up

Size, copies, colour or B&W. Price shown first.

04

Pay

UPI or card, then confirm to print.

05

Collect

Pages land in the front tray.

Each operator sets the per-page price. Example on the customer app: B&W A4 at ₹2, colour A4 at ₹5. Every rupee goes to you.

100%

of every rupee printed stays with you.

No revenue share. No per-print commission. No software subscription. You buy the machine once and it is yours.

S1 PRO · 500 PRINTS/DAY

≈ 3.1 months

to pay back the machine

S1 PRO MAX · 2,000 PRINTS/DAY

≈ 1.6 months

to pay back the machine

Illustrative payback at an average ₹3 per print, 30 operating days a month. Actual results depend on location and pricing.

Your ink cost per print

	S1 PRO	S1 PRO MAX
Black ink	**₹0.60** per A4 page	**₹0.30** per A4 page
Colour ink	**₹1.80** per A4 page	**₹1.98** per A4 page

	OTHER KIOSKS	SNAPRINT
Software	Tied to a platform	**Independent software**
Fees	Recurring charges	**One-time installation fee**

What your site needs

A flat floor space of 55 × 70 cm, one power point and a network connection (Ethernet, Wi-Fi or SIM). Keep a UPS on the line so a job in progress finishes through a power cut.

Every file gone after every print.

Encrypted end to end

AES-256 encryption in transit and at rest. TLS on every upload.

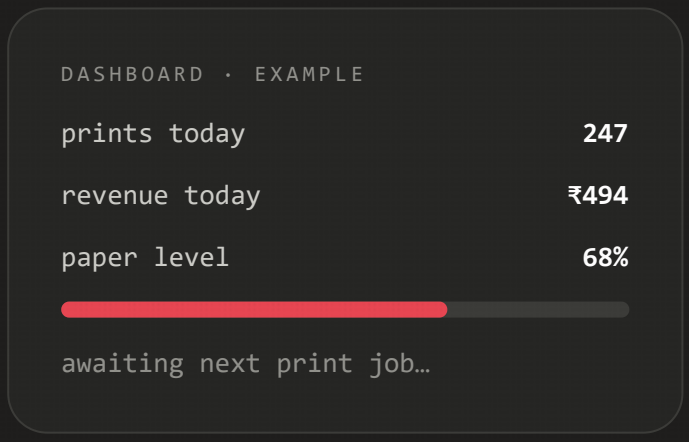
Purged on completion

No cloud copy, no shop-side archive, no sharing with third parties.

YOUR KIOSK, ONE SCREEN

Run it from your phone.

Live revenue, print counts, paper level and kiosk status. The rear panel is lockable and opened by the owner only.



Independent software

Runs on its own. No platform tie-in, no revenue share.

Orders queue

Jobs wait for the kiosk, with or without you present.

Bengaluru support

On-site help from the team that builds it.

Live in your space within the hour.

1

Reach out

Email us and we reply with next steps.

2

Choose your model

S1 Pro or S1 Pro Max, by footfall.

3

We install it

Setup and software included.
